# Data Mining Academic Emails to Model Employee Behaviors and Analyze Organizational Structure

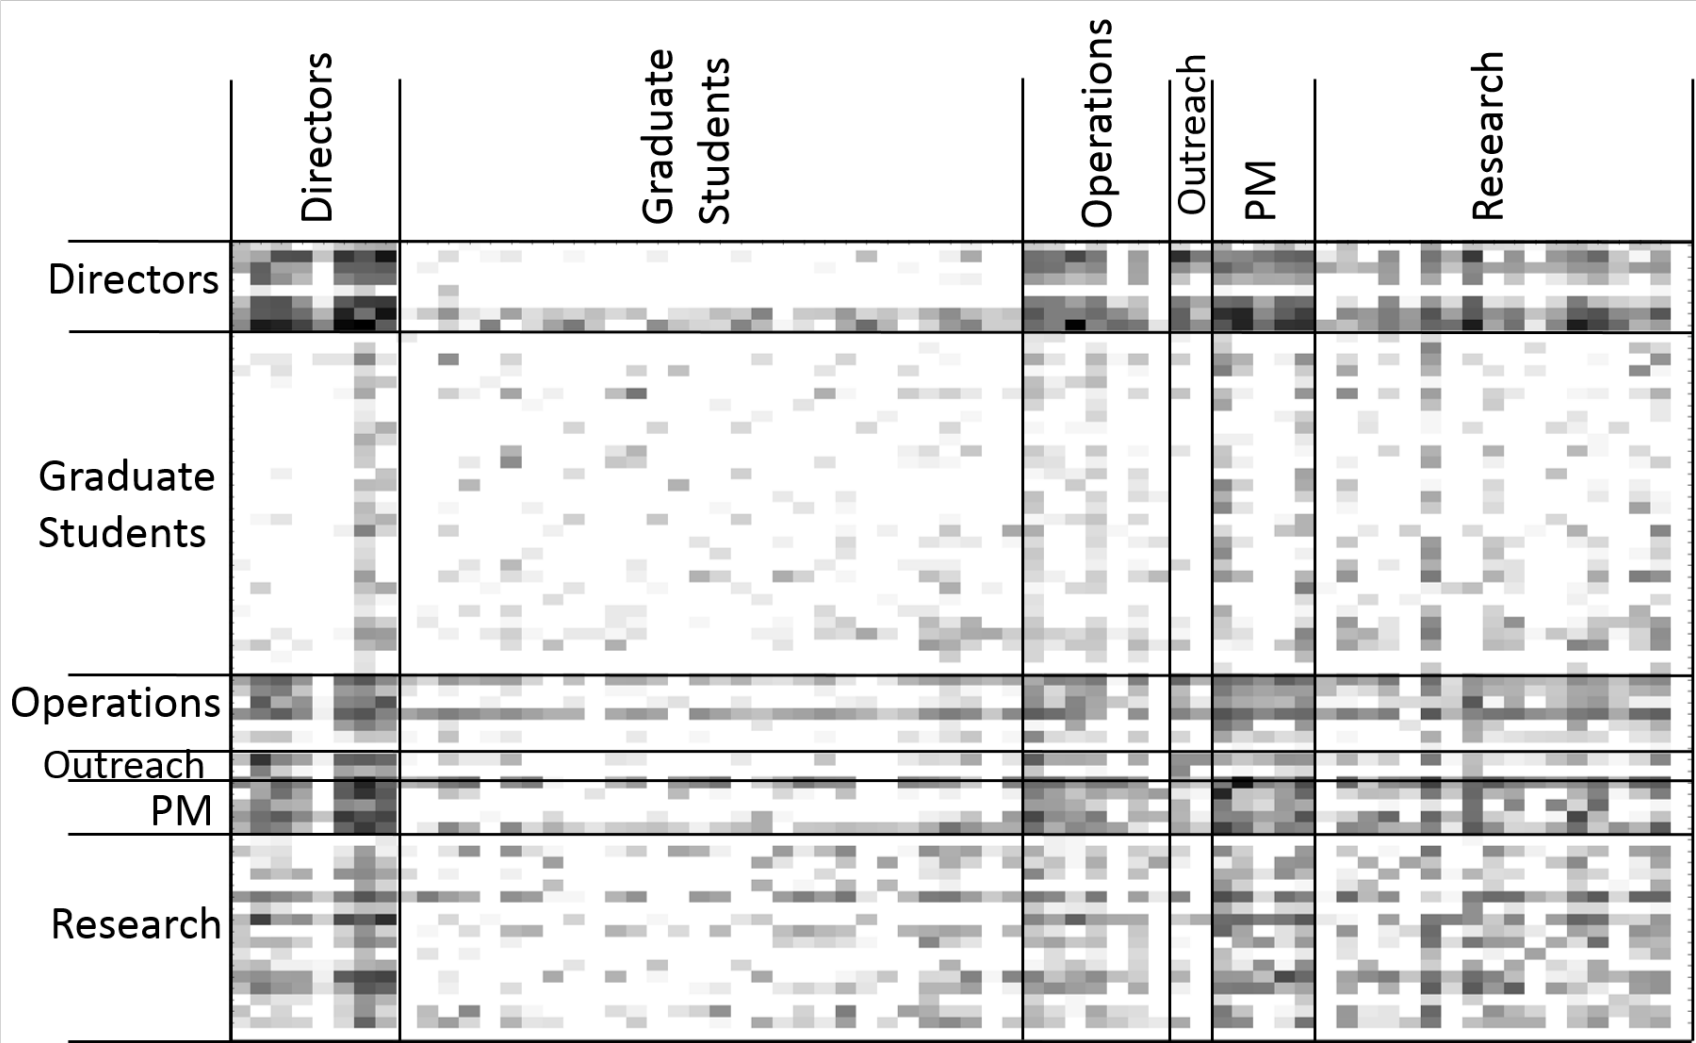

2/3/16

[hume@vt.edu](mailto:hume@vt.edu)  
[www.hume.vt.edu](http://www.hume.vt.edu)

Hume Center Overview Presentation

- Problem
  - Email is everywhere!
  - Can a better understanding of an organization be gleaned from internal emails?
  - Application: business reorganization
- Approach
  - Enron dataset has issues, so collect anonymous email metadata from volunteers
  - Calculate 98 different features, including traffic-based and social-based
    - Unique subjects received, number of forwards received, hubs
  - Use random forest algorithm to predict job title from features
  - Compare trends in data with organizational chart
